

Don't forget, the White Rose worksheets are on our website (on the Maths page in home learning section) for you to download and teachers have also been setting tasks on My Maths, Manga High and Education City.

The teachers have been playing TTRS as well and they're getting pretty good, so I hope you're practising too!

If you have a go at the Maths challenges or do any fun maths work, don't forget to send them to your teachers or to Miss Evans at year6@swaythlingprimary.org and we can put it in the Maths newsletter next week!

Totality

Rowan in Year 6 showed Miss Evans a really cool board game website this week called 'board game arena' which can be found here: <https://en.boardgamearena.com/>.

All the teachers love board games and most of them have an element of maths included, like snakes and ladders where you have to add numbers to move spaces or monopoly where you do the same and use money!

So why not have a go at some board games online if you don't have any at home or have already played them a million times during lockdown!

The teachers also really love Maths games so here are some links to our favourite games for you to play:

Totality: <https://nrich.maths.org/1216>

Multiplication tables - matching cards: <https://nrich.maths.org/1252>

Nim - 7: <https://nrich.maths.org/1204>

Race to 100: <https://www.youcubed.org/tasks/race-one-hundred/>
